Cell Wellbeing Introduction

Was established in 2007 in Hamburg! Cell Wellbeing Ltd is a working collaboration of business, science and industry professionals that specialize in the development of epigenetic mapping technologies and personal optimization strategies.

Harnessing the latest in Quantum Biology and using our leading-edge German technology, along with the most forward thinkers in the field, we have created a personal optimization platform for multi-industry use.

Empowering Practitioners With Personalized Epigenetic Nutritional & Wellbeing Reports

About Epigenetics

Epigenetics is shaping the way we approach wellness; proving that the environment is the key to how our genes express and the way this impacts our daily wellness & illness prevention regimes.

The Report

Epigenetic reports consists of 30+ page's highlighting potential functional impacts caused by Environmental Toxins, Electromagnetic Impacts, Nutritional Diet, Lifestyle and Underlying Food Stressors. Each report also provides a 90 day nutritional food plan and further advice on optimizing your wellbeing.

Cell Wellbeing is compliant with FDA rulings. Cell Wellbeing Ltd is a working collaboration of business, science and industry professionals in order to provide personalized nutritional epigenetic mapping reports as well as personalized optimisation strategies.

The Report

Harnessing the latest advances in digital age technologies, we provide practitioners with a tool for every client to benefit from using a personalized nutritional epigenetic report. The information is based on four hair strands and their roots. Each report contains a wide range of nutritional information, including Vitamins, Minerals, Amino Acids, Fatty Acids, Anti Oxidants and potential environmental impact information.

Our Nutritional Epigenetic mapping technology and servers are based in Hamburg, Germany. We use certified and CE-approved systems and resonance technologies, which operate 24 hours a day, 365 days a year.

Testimonials

As a holistic healthcare practitioner our goal is to get to the root of our patient's chronic health concerns. Before utilizing the hair scans, patients were having to pay thousands of dollars in testing and waiting weeks for the results just to begin care. The hair scan analysis has been a game changer as it provides in depth health reports on a patient's first visit at a much more affordable price. Allowing me to live my purpose in helping as many people as possible achieve optimal health!

Dr Hailie Elchos FL,USA

Ever since partnering with For Healthy Cells to offer our clients their hair scan diet optimization analysis, we have been able to reach clients in all new ways. Our program is focused on health and we really appreciate how For Healthy Cells is as well. Steve and Julie have provided us with incredible expertise, leadership, guidance, and support as this partnership has developed. This partnership has allowed us to help adults, children, pets, and athletes with dietary choices. We have also been able to help those struggling with hair, skin, and nail health by knowing what foods will optimize these areas of their lives. Thank you For Healthy Cells!

Nate Evans

In the two years I've used the epigenetic mapping technology in partnership with a large health food store, the system has provided a wealth of information to my clients. They are very pleased with the results and it continues to enhance and expand my business.

Robin Clifton, Provider, Rancho Mirage, CA

Testimonials

The individualized epigenetic hair follicle mapping technology has revolutionized both my personal practice as well as the teaching and research I do with PhD students at an online university. The reports created with this technology have been a powerful tool in helping to empower others with more personalized knowledge about their wellbeing

Dr. Otilia Tiutin PhD, DNM

Doctor of Natural Medicine

Faculty Member at Quantum University for
Integrative Medicine

I am very satisfied professionally with the results and the evolution of the patients to whom I have personalized their feeding programs based on the epigenetic biomarkers obtained with the Cell Wellbeing S-Drive. In my opinion, it is a device that provides added value to our services and offers the possibility of knowing with certainty the cellular energy environment of our consultants, knowledge that brings us closer to optimization in a natural, coherent and organized way. It is an honor for me to be part of the technical team.

Martín Sebastián Azanza Pellerino

SPECTACULAR! Without a doubt an accurate and detailed analysis of the innermost part of our body and the basis for a state of well-being and Healthy. Technology, Epigenetics and Physiology in its purest state available to everyone for their health improvement. Fully integrated in my treatments as a Physiotherapist.
